SUMMARY

Aspiring **Data Engineer** with hands-on experience in **SQL, Python, Microsoft SQL Server, ETL, Data Warehousing, SSIS, SSAS, SSRS, Power BI, Data Analytics, Business Intelligence, and Data Visualization**. Skilled in database management, data integration, transformation, and building analytical data solutions. Familiar with **Microsoft Azure, Big Data tools, and Data Science fundamentals**, with a strong focus on developing scalable data pipelines and reliable data warehouse solutions.

EDUCATION

Information Technology 2023 – 2027
Computers And Artificial Intelligence Damietta University Damietta,Egypt

EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI) 2026 – 2027
Ministry of Communications And Information Technology Hyprid
Completed the AI & Data Science – Microsoft Data Engineer program.

- Gained hands-on experience in Python, SQL, and database management.
- Worked with data pipelines and ETL processes for collecting, transforming, and organizing data.
- Developed knowledge of Data Warehousing, Big Data processing, and scalable data architectures.
- Explored cloud-based data engineering solutions using Microsoft Azure.
- Applied data engineering concepts through hands-on projects and real-world applications supporting analytics and business intelligence.

PROJECTS

SQL Data Warehouse 08/2026 – Present

- **End-to-End Lakehouse Architecture:** Designed and built an enterprise-grade SQL Data Warehouse from scratch using a Medallion Architecture (Bronze, Silver, and Gold layers).
- **Automated Data Integration:** Developed robust SQL ETL/ELT pipelines to extract raw CSV source datasets, execute data cleansing, and consolidate disparate systems into a unified target environment.
- **Dimensional Data Modeling:** Architected analytics-ready dimensional models (Star Schemas with Fact and Dimension tables) to optimize reporting and business intelligence queries.
- **Data Quality & Governance:** Implemented automated data validation checks, primary/foreign key integrity enforcement, and documentation standards across all data transformation layers.
- **Portfolio & Version Control:** Structured the full codebase, database scripts, and architectural blueprints within a Git repository to follow production-grade engineering workflows.

SKILLS

TECHNICAL SKILLS
Data Engineering: Data Engineering, ETL, Data Warehousing (DWH), Big Data Tools
Databases: Databases, SQL, Microsoft SQL Server
Microsoft BI: SSIS, SSAS, SSRS, Microsoft Power BI
Data Analytics & Visualization: Data Analytics, Business Intelligence, Data Visualization
Data Science & Programming: Python, Data Science
Microsoft Office: Microsoft Excel, Microsoft PowerPoint
SOFT SKILLS

- Effective Communication and Presentation Skills
- Teamwork and Collaboration
- Time Management and Prioritization
- Adaptability and Flexibility
- Initiative and Self-Motivation
- Attention to Detail
- Positive Attitude and Willingness to Learn

LANGUAGES

ARABIC : Native
ENGLISH : A2
